WevoPBX For Your **Current** and **Future** Communication System

EASE OF USE

Easy to deploy and manage via WEB interface. Receptionist or Operator can utilise WEB operator panel for calls monitoring and transfer. A web user portal for user to set their own call forwarding, Web Fax, CDR and etc.

ALL IN ONE

Contain all the telephony features in a box such as IPPBX, CDR, CTI, ACD, Call Recording, Fax to Email, WEB Fax, Firewall, Call Routing and many more...!

GROWS WITH YOU

WevoPBX is scalable in terms of hardwares and softwares. The system uses standard server based hardware which can be upgraded to increase capacity. High availability feature is available to minimize down time and increase utilization. Since it is IP based solution, you can link all your businesses to reduce cost and unify all of them.

HIGH CONFIGURABLE

Since it is using Open-Source softwares, all source codes is available for customizations. As your business expand you do not need to find other solutions to cater for your future expansion.

COST SAVING

WevoPBX is a truly IP based solution which is able to integrate with Internet VOIP providers which give excellent call savings and break free from expensive proprietary solutions which have fewer features..!!
